**THE GOVERNOR AND THE DEPUTATIONS.**

From the first speech of His Excellency at Esquimalt to his reply on Saturday to the Clergymen of the Church of England, we cannot refrain from expressing our gratification. The tone of liberality and good sense which pervades them all—the clear, manly way in which every hitherto confounding interest has been met, augurs well for the future. Governor Kennedy has taken his stand on the only tenable foundation for a successful Colonial ruler—he has asserted that he knows but one party, and that party the people. Although enunciating sentiments which must have jarred occasionally on the feelings of a few, his straightforward manner in dealing with all the subjects that have come up before him, has won the respect of everyone. In a community like our own, so diversified and heterogeneous, many a Governor would have shirked, at the outset of his career, questions which formed special subjects of controversy among ourselves—or at most would have dealt with them in a very general manner. No so, however, Governor Kennedy. He boldly takes his stand as a man who has seen much of those difficulties which are generally to be found in communities of crude formation. He sees at a glance the little evasions, which we, in our relative ideas of magnitude, convert into vast chasms. Looking from a higher stand point he is able to take a more comprehensive view than those whose minds revolve round a contracted surface. His observation is not obstructed by his own or his neighbor's house, but takes within its range the vast area of the public good.

There are two subjects upon which His Excellency has spoken that deserve more than a passing notice—publicity in the affairs of Government, and education of the people. With regard to the former the Legislative Council were no doubt rather taken aback by His Excellency's abrupt question in connection with their secret sittings, and appear to have been startled into very irrecovable answers. One or two members denied that they had sat with closed doors, while another, the President, stated they were obliged to do so, on account of the Executive frequently sitting with the Legislative Council; although they would have admitted any one who chose to apply. It was the clear members found themselves in a disagreeable position, and hence their extraordinary attempt to deny what has been until the last week or so a fact not only known to every one in the colony, but commented on time and again by the press. It is not, however, to this interview of the Council that we are indebted for the knowledge of His Excellency's desire for publicity in all the branches of Government. In our local columns it will be seen that Governor Kennedy has distinctly expressed himself anxious to afford to the public, through the press, every information that is not in its very nature strictly private. We can scarcely overrate the good effect which is likely to produce. One of the greatest drawbacks in the past was the impulsive reticence of the Government on all matters of public importance. On the mind of a discontented population this secreted most mischievously. It forced upon it that pressure which bursts the boiler and explodes the shell. It gave to things comparatively harmless in themselves, a confinement that made them dangerous. Secrecy is the mother of suspicion, and suspicion soon engenders disquietude, dissipation and discontent. Publicity, on the contrary, is the grand safety valve. It gives the steam worked up by political agitation a vent, and renders the demagogue, as well as the "wise worker" innocuous. It creates and fosters that confidence between the governing and the governed, which is the surest guarantee of a country's prosperity. The represented as well as the representatives, being made conversant with the actual state of affairs, an active interest is at once created in the government of the country, and the greatest stimulant is given to the public mind. It is to fact the greatest safeguard against blunders, defalcations and wrongs.

The conversational speech of Governor Kennedy to the Church of England clergymen will be found in another column. It embraces the education question in its most important bearings. His Excellency believes only in the non-sectarian and common school system; looks with disfavor on a multiplicity of schools in a small population; and wishes to see the boys, who are to act in after years together as men, brought up together at school. At the present juncture, we are extremely fortunate in getting a Governor whose ideas on this important question are unclouded by the antiquated prejudices of well-meaning but mistaken clergymen. Our population has been suffering the very ill-detailed by His Excellency as likely to result from the absence of a national or common system of education. We have been struggling for five years with the most imperfect means of instruction—with a multitude of small schools—with division instead of union, discord instead of harmony. The remarks of the Governor are, therefore, exceedingly opportune. They come at a moment when the question of education, through religious neglect, is exciting the greatest commotion—when upwards of a hundred children are running through the streets, their mental culture uncared for. They come when the City Council, with much higher ideas of public duty than the more ambitious body across James Bay, are initiating a movement for the education of our youth; and they come at a time when the bickerings and divisions of classes and parties seem for the nonce swallowed up in the general rejoicing over a new regime. As we have said we are gratified at the stand the Governor has taken on every public topic—we are rejoiced that our estimate of the man has turned out correct, and that by the well understood wishes of the people only is the Government to be carried on.

### CITY MARKET REPORT.

SATURDAY, April 24, 1864.

During the past week the market has continued in the most unsettled state; the holders of flour and other produce are unwilling to sell below the late advance, and there are no buyers at these rates, except to meet pressing demands. Prices generally have a downward tendency. The next advances from San Francisco are anxiously looked for.

IMPORTS.—The bark Speedwell, from London, arrived last week with a large and valuable cargo of general merchandise, which has been discharged in excellent condition.

The bark Frances Palmer arrived on Wednesday from San Francisco with a cargo valued at \$31,057, consisting of 1293 qrs. barley, 1323 qrs. flour \$1000 bushels 49 cases lard and general merchandise.

The steamer Sierra Nevada arrived on San Francisco on her return trip English goods to the value of \$4,000.

PROVISIONS DURING THE WEEK.

FLOUR—Golden Gate, held firm at \$7.75; small lots \$8. extra, \$8.75.
